NO IDLING AT THE PORT OF VANCOUVER

Wastes Fuel

- A typical heavy-duty truck can burn approximately one gallon of diesel fuel for each hour it idles, costing you money

Wear and Tear

- Causes more oil and oil filter deterioration
- Increases the frequency of oil and filter changes
- Lessens engine lifespan and hastens the need for rebuild

Health Risks

- Exhaust from idling diesel trucks can accumulate, posing a health risk to you and others in the vicinity
- Idling exhaust can pollute the air inside nearby buildings
- Exposure to diesel exhaust can cause lung damage and respiratory problems
- Diesel exhaust makes asthma and existing allergies worse, and long-term exposure is associated with an increased the risk of lung cancer

Thank you for turning off your engine.
